

BUDDY WALKERS

- Divide the students into 3 groups. Divide each group in half and place in shuttle formation.
- Two students get on the buddy walkers and pull the ropes tight.
- On the command to "GO" students will race across the grass to the team waiting across from them.
- When that team reaches their teammates the next group hops on and races back across.

Remind students no forward movement if they are not on the buddy walkers together.

Some variation could be to make the teams avoid the cones that are set in their way.
